

Paris, **13 February 2018**

Monext 2017 results: more than 2.5 billion transactions, for a total amount of €122 billion!

With growth of 25% year on year in the number of transactions processed, Monext is positioned as a key player in payment processing.

This growth is the result of the following, in particular:

- Monext's innovative culture, aimed at improving on-line and in-store payment pathways and at offering appropriate "omni-channel" solutions,
- The performance of its platforms, which boast a record year and record days in terms of volume (a Black Friday which broke all records with a 41% increase against 2016, a historic 23 December of last-minute in-store Christmas purchases),
- A banking landscape undergoing substantial changes. Faced with the rise in fintechs and the digitisation of banking, Monext is constantly improving its products and services with a "user first" approach. The card processing business has been entirely overhauled and renamed [tweest](#) with a view to managing the wide range of requirements of conventional banks, on-line banks and fintechs.

All these wonderful achievements were brought about by our **400 employees, 60 of whom joined Monext** last year...

To sum up, Monext in 2017:

- **2.5 billion transactions**, for €122 billion
- **40% market share** (in France) for on-line payments
- **20 million cards** processed
- **A turnover of €76 million**
- **7500 merchant clients**
- **150 financial institutions**

The outlook for 2018 will focus on the development of omni-channel pathways for our merchant clients: drawing inspiration from the in-store purchase pathway to enhance the on-line purchase funnel, with innovations such as "[Payline Shortcut](#)".

Monext continues to assist large retailers with the digitisation of in-store pathways, in particular with its "wallet manager" solution for tailor-made mobile payments.

Its Payavenue pre-acquisition service will be extended to specialist distribution brands.

For its banking & fintech clients, Monext is continuing to review its tweest solution and to innovate in the features offered to cardholders.
