

Press release
Paris, 12th June 2017

MONEXT, sponsor of Money20/20 Europe, presents two new features:

- **“Tweest”, a card processing service with an increasing number of innovative functions,**
- **A new interface for its multi-channel conversion solution**

26 - 28 June 2017 | MONEXT: Hall C3 – Stand F 10

Monext, a key player on the French and European electronic payments markets, will be present at the Money 20/20 show in Copenhagen (26-28 June 2017) to present its range of products and services for merchants, e-merchants, banks and FinTechs.

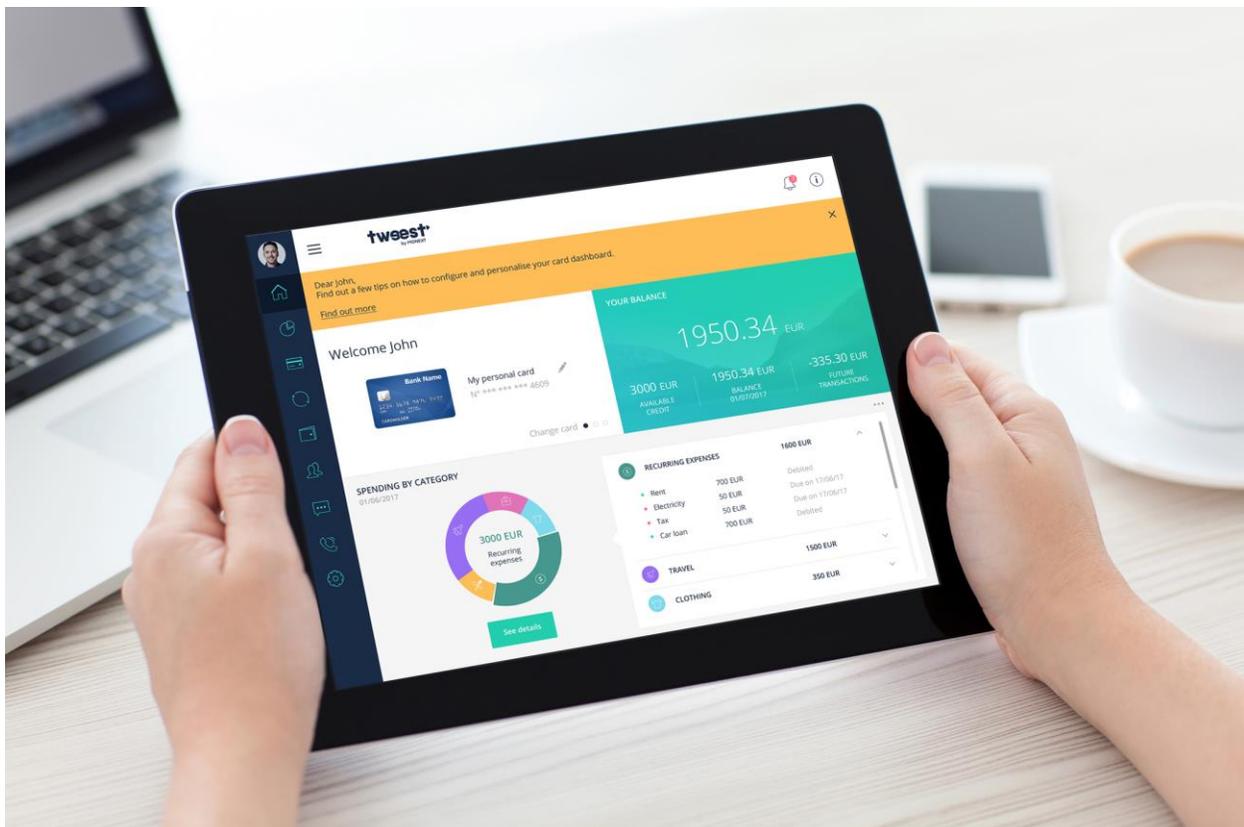

Monext already supports more than 7000 merchants (Amazon, Française des Jeux, Le Mouvement Leclerc, Rue du Commerce, Voyage Privé, Ventes Privées, PMU, Carrefour, Système U, etc.) and thereby manages more than one third of Internet/mobile and in-store payments in France with its Payline solution. As a partner of 150 financial institutions (Compte Nickel, Orange Bank, Axa Banque, BforBanque, Keytrade, etc.), Monext is present across the entire payment chain: card processing, mobile payment solutions, loans, etc.

A redesigned card processing solution, including all services which have now become essential

Multi-product, multi-service, multi-format, Monext’s card processing solution is innovative and is constantly adapted to new user habits and experiences. Aimed at banks, on-line banks and FinTechs, the all-new version of the solution “tweest” makes the following possible:

- Simple, intuitive, quick and multi-channel enrolment: subscription in 5 minutes, from all channels, web, tablet or mobile, for an optimum enrolment experience.
- Instant card issuing: in bank branches, pop-up branches or stores.
- All card configurations in real-time and by the cardholder: unexpected expenses, travel abroad? Cardholders can adjust their ceilings, according to their needs, at any time.

- Real-time expenditure monitoring: with notifications via app, by SMS, by e-mail: cardholders choose how they wish to be contacted.
- Accounts credited by transfer or bank card.
- The option of blocking the card without cancelling it: for cardholders who want to give themselves time to find their mislaid card.
- Provision of a "virtual" card: for instant Internet expenses, while waiting to receive the "actual" card.
- A single card for personal and professional use: with the option of placing expenses into categories, managing expense claims, in just a few clicks.
- ...

The Payavenue solution unveils its brand-new user interface

Purpose-designed for organised trade, Payavenue meets the payment aggregation challenges of all brands.

Already used by major retail names (PMU, Indigo, Le Mouvement E.Leclerc, Ludendo, Système U, etc.), Payavenue can manage payments centrally, regardless of the sales channel (stores, fuel distributors, vending terminals, Internet, drive, etc.) and irrespective of the banks of these merchants. This solution allows merchants to achieve the best position to negotiate with acquiring banks, to manage risk in a comprehensive and effective manner, to maintain total independence from terminal manufacturers and to optimise their “customer” knowledge, etc.

Monext’s teams will exclusively present the latest **merchant steering and business monitoring interface**. Designed to meet users’ needs (via interviews conducted among all future users), the interface is particularly aimed at financial profiles (company treasurers, financial directors, accountants, store managers, etc).

This customizable interface has been upgraded to ensure users enjoy fluid and multi-device consultation, but also to simplify screen displays made complex by the great amount of data (tables – figures, etc.), essential for simple and effective steering.
